

Narrative Continued:

Case Number

[Redacted Case Number]

After speaking with [Redacted] I received a call from him in which he told me that ⁸⁷⁸⁰

[Redacted] secretary also had some additional information about the suspect.

I then spoke with [Redacted] She states she has met Gordon MacRae at an xmas party given in the home of [Redacted] who lives on [Redacted]. She then told me that the suspect was sexually involved with a then Keene High student named [Redacted]. She knows he isn't a student any longer in Keene, and believes he went away to college. She thinks he is 19 years old at this time. The matter so far as she knows was never investigated by either the Police or DCYS and or any agency. The victim had gone to MacRae for counseling and was coerced into a sexual relationship.

I ran a name search through the computer and found the following:

[Redacted Name Search Results]

On 2 Nov 88, I received a call from Det Waudell of the Hampton Police Department. He researched the files and found a case report of the incident involving our suspect in his town. He said the incident occurred in 1983 and was dealt with at that time by DCYS worker, Marglyn Frazier. At that time the incident was found to be founded. The victim at the time of the sexual assault was 14 years old. He later disclosed the abuse again in 1986 to a psychologist who thought the abuse was recent and who reported the matter back to DCYS. The parents contacted the Hampton Police Department and spoke with Det Waudell. They wanted him to re investigate the case because they were very disturbed over the way the catholic church handled the manner and wanted to sue them. DCYS sent a letter to Waudell at the time telling him no fresh investigation was needed. The matter was resolved in 1983 with the suspect having a treatment plan approved by the Attourney Generals office. The Cheshire County Attourneys office was then notified since the treatment and residency of the suspect would be in the Keene area. A copy of the case report will be sent by Hampton PD.
